“

Any fool can write code that a computer can understand. Good programmers write code that humans can understand.

-Martin Fowler

About Me

Hi, I am Amani

The passion I have for coding have pushed me to make a career shift into coding. from a civil engineer to a coder.

I used the skills I've learned in my engineering study journey to success in coding field. some of logic , management and solve problem skills are more than enough to let the engineer make an easily shift to coding field.

full stack development needs a lot of active leaning to know more about what is new in front-end and back-end development and I believe I have the passion and excitement to learn more.

Qualifications

I like to code things from scratch, and enjoy bringing ideas to life in the browser. also I genuinely care about people, and love helping fellow designers work on their craft.
